

Top Marks Website Review

You can find this website by searching Top Marks in Google.

On this website, you have a selection of maths and English games. It's also available to download as an app for a small charge.

The recommended age is 3 to 11 and you can pick the age suitable for you.

You can pick the age by looking at the top of the page and choosing the appropriate age group.

The higher the age, the harder the games get, but they are still very fun!

I would recommend 'Hit the Button' because it really helps your mental maths and it is used in most primary schools.

Pros

- Really fun
- Helps you a lot with mental knowledge for maths and English
- You can go on it very easily
- Most ages can go on it and it is not too hard

Cons

- You have to pay for the app, but it's free online.

We hope you found this review useful for you and your child.
